

# **Tekniktävling 2025**

## **Framtidens väska**

### **iBag**

Namn: TeamWeDunno

Skola: Backegårdskolan

År: 2025

## **Idébeskrivning**

We have made this bag to lift your apple devices.

The whole bag is like a power bank so when your device is in the bag it charges. It has a pothotspot so you have wifi.

detachable wheels. It has an alarm where if a device that's connected to the the bag if like u forget ur device on a class it sets an alarm and a notification on ur other devices and it locks the phone until the owner gets it. also a mini water cooler on side

## **Målgrupp**

Preferably college age group. because we know college students have trouble with devices and are afraid they will lose it forever. and not charge it enough for a exam or essay

## **Design**

The iBag has detachable wheels that can be put on and carried like a transport suitcase. Mini cooler on the side. zipped up front for a screen to be behind it. Solar panels on the top. Apple company logo right in the front. Apple stylus pencil baggie attached on the side. Fingerprint censor. etc

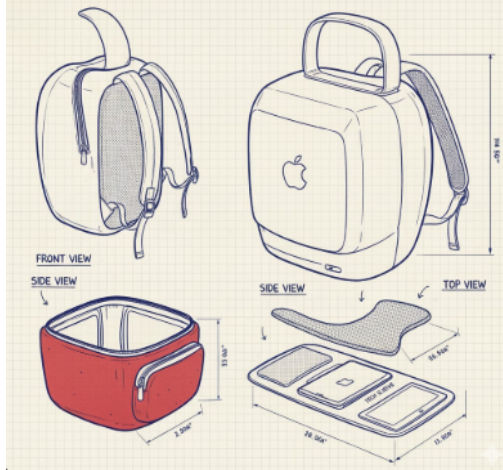

## **Tekniska lösningar**

The iBag can follow you every direction you go with an app that you can download.

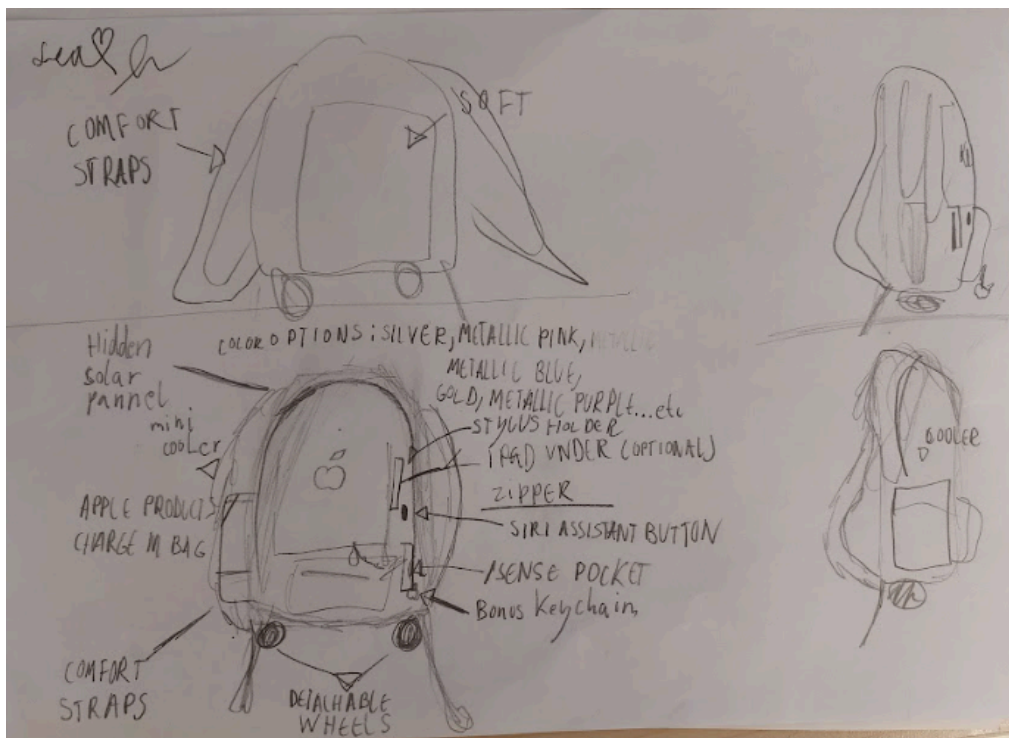

## **Måttatta skisser**

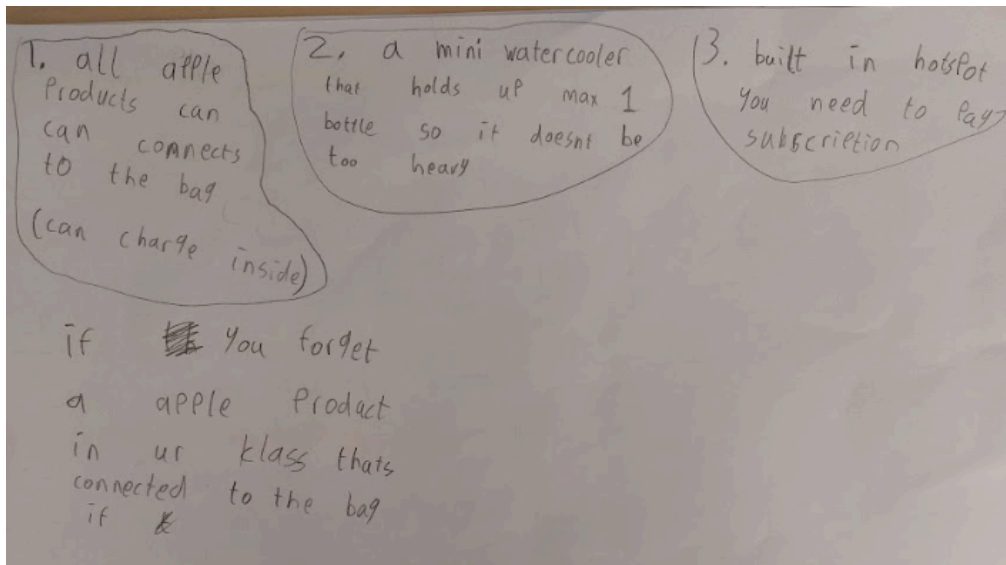

(what we expected it to be like. NOT OURS BTW)

► APPLE COMPUTER

Our sketches:

## Reflektion

I guess it went well but some teammates didn't work enough, which is why we didn't have so much text. Or work. Some of our members were sick as well. Otherwise it went well to work together.
